### **Couple Typology (based on Core Scales)**

#### **Conventional Couple Type**

Based on the PCA scores across the core categories, this couple is best categorized as a **Conventional Couple**. Conventional couples are often highly committed and have more strengths in areas such as Relationship Roles and Spiritual Beliefs. They can improve the quality of their relationship by working on communication and conflict resolution skills.

Based on research PREPARE/ENRICH categorizes couple relationships into one of five common patterns:

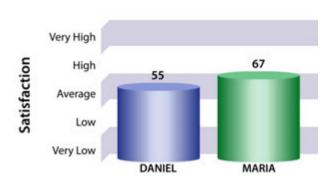

- Vitalized couples are typically the most satisfied with their relationship, skilled in communication and conflict resolution.
- Harmonious couples also enjoy high levels of satisfaction across most areas of their relationship.
- Conventional couples are often highly committed to one another, but not as skilled in communication or conflict resolution.
- Conflicted couples have a lower level of satisfaction and often struggle with many areas of their relationship.
- Devitalized couples have the lowest level of satisfaction and have growth areas in almost all aspects of their relationship.

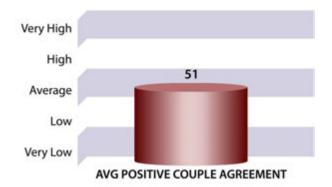

#### **Strength and Growth Areas**

Levels of Positive Couple Agreement	Core Scale plus Customized Scales *
Relationship Strengths (PCA=80-100%) Areas with High Couple Agreement	Leisure Activities Parenting Expectations * Relationship Roles
Possible Relationship Strength (PCA=50-70%) Areas with Moderately High Couple Agreement	Financial Management Sexual Expectations Spiritual Beliefs
Possible Growth Areas (PCA=30-40%) Areas with Moderately Low Couple Agreement	Family & Friends Marriage Expectations * Partner Style & Habits
Growth Areas (PCA=0-20%) Areas with <i>Low</i> Couple Agreement	Communication Conflict Resolution

#### **Overall Satisfaction**

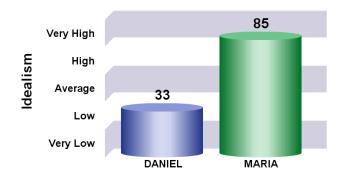

The graphs below plot the **Overall Satisfaction** for each individual and the couple, based on the Core Scales.

#### **Idealistic Distortion**

**Idealistic Distortion** measures the extent to which a person distorts the relationship in a positive direction.

**Daniel** is generally realistic and open to admitting limitations or problems in their relationship.

**Maria** is often idealistic about their relationship and may tend to deny or minimize problems.

#### Interpretation of Idealism

A high score (above 65%) indicates that a person describes the relationship in an overly positive manner and sees it through "rose colored" glasses. A lower score (below 40%) indicates a more realistic approach to describing the relationship.

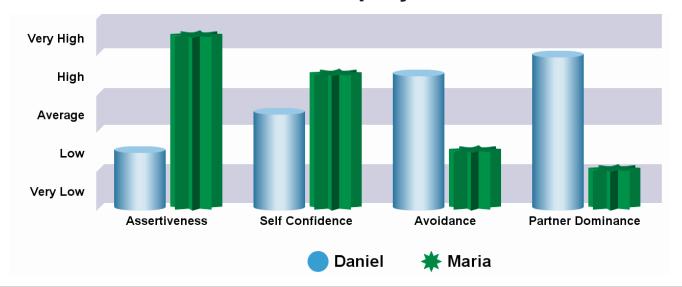

#### **Revised Individual Scores**

In order to provide more accurate Individual Scores for each category, each person's Individual Scores are corrected based on how high their score is on Idealistic Distortion.

1 2 3 4 5
-----------

Daniel	Maria	Idealistic Distortion Items
2	4	Every new thing I have learned about my partner has pleased me.
4	5	I have never regretted my relationship with my partner.
2	4	My partner always gives me the love and affection I need.
2	4	My partner and I understand each other completely.
1	4	My partner completely understands and sympathizes with my every mood.
3	3	My partner has all the qualities I've always wanted in a mate.
3	4	We are as happy as any couple could possibly be.

#### **Relationship Dynamics**

**Assertiveness** is the ability to express one's feelings and ask for what one wants.

Daniel: Low

Daniel has some difficulty expressing thoughts and feelings, and sometimes finds it difficult to ask for what he/she wants in the relationship.

Maria: Very High

Maria is good at openly expressing thoughts and feelings and can easily ask for what he/she wants in the relationship.

**Self-Confidence** focuses on how good one feels about oneself and their ability to accomplish what they want in life.

Daniel: Average

Daniel has a moderate level of Self Confidence and may generally have positive self-esteem, and typically feels good about his/her ability to accomplish what is wanted in life.

Maria: High

Maria has a high level of Self Confidence, positive self-esteem, and feels assurance of his/her ability to effectively accomplish what is wanted in life.

**Avoidance** is the tendency to minimize issues and a reluctance to deal with issues directly.

Daniel: High

Daniel scored in the high range and may tend to minimize problems and be reluctant to deal directly with issues.

Maria: Low

Maria scored low in avoidance and will generally be open to identifying and discussing issues in their relationship.

Partner Dominance focuses on how much one feels controlled or dominated by their partner.

Daniel: High

Daniel scored in the high range in Partner Dominance and may often feel his/her partner is dominant, controlling, or interested in managing his/her life.

Maria: Very Low

Maria scored in the very low range in Partner Dominance and does not feel his/her partner is dominant, controlling, or interested in managing his/her life.

#### **Personal Stress Profile**

The **Personal Stress Profile** examines each individual's personal stress level over the last year. For engaged couples, stress levels are based on responses to 25 common sources of personal and wedding-related stress.

**Daniel** appears to have a very high level of personal stress, which can create demands on a person's time and energy. The stress may also contribute to problems with physical, relational, and emotional health. It will be helpful to learn and make use of effective coping resources to better manage personal stress.

**Maria** appears to have a moderate level of frustration or personal stress. Such frustrations and stressors may at times affect attitudes, health, and relationships. It will be helpful to identify effective coping resources so stress does not become overwhelming.

#### How often have these issues created stress for you?

Never 1 Seldom 2

Sometimes

Often 4 Very Often

# Daniel Top Stressors

#### Very Often

Decisions about wedding details Your current living arrangement

#### <u>Often</u>

Dealing with your in-laws Lack of exercise Lack of time for fiancé

#### **Sometimes**

Emotionally upset/emotional issues Fiancé not getting things done Fiancé stressed by wedding planning Your partner

# Maria Top Stressors

#### **Very Often**

Dealing with the wedding party Decisions about wedding details Financial concerns

#### <u>Often</u>

Lack of time for friends Your current living arrangement

#### **Sometimes**

Emotionally upset/emotional issues
Lack of time for fiancé
Opinions from friends or relatives
Your job
Your partner

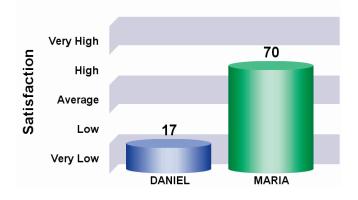

Help this couple compare their lists of top stressors. It is not uncommon for the lists to be somewhat different. Take a moment to help them discuss which stressors are similar and which are different. Key resources for coping with stress include healthy communication, conflict resolution, flexibility, and closeness.

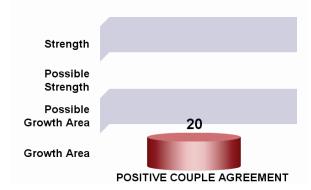

PREPARE/ENRICH Exercises: Identifying Most Critical Issues, Balancing your Priorities,

Wedding Stress

#### **Communication**

The **Communication** category measures how couples feel about the quality and quantity of communication in their relationship. It explores how they share feelings, understand, and listen to one another.

**Daniel** appears to be very concerned about the quality of their communication and feels they have few strengths in this area.

**Maria** feels positive about their communication and how they share feelings and listen to one another.

**Growth Area:** The couple disagrees or shares mutual concern about most items in this category. Help them discuss 1-2 Agreement items and 2-3 of the Disagreement, Indecision, or Special Focus items listed below. By practicing and learning new communication skills, such as assertiveness and active listening, they can improve their relationship.

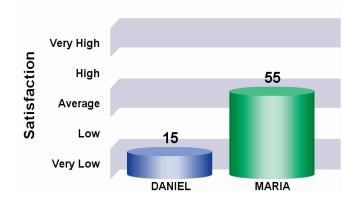

Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	
1	2	3	4	5	

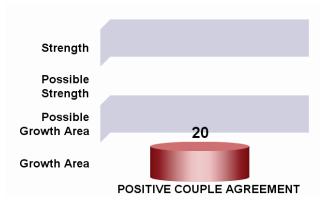

Daniel 2 1	Maria 1 1	I wish my part	ple Agreement (20%) Ener were more willing to share his/her feelings with me. Inave trouble believing everything my partner tells me.
5	1	<b>Disagreeme</b> At times it is h	nt (50%) nard for me to ask my partner for what I want.
2	5		my true feelings to my partner.
4	2		or me to share negative feelings with my partner.
2	5	My partner is	a very good listener.
1	3	When we are	having a problem, my partner often refuses to talk about it.
2 3	3 2		<b>20%)</b> sfied with how my partner and I talk with each other. metimes makes comments that put me down.
4	4	<b>Special Focu</b> My partner of	ts (10%) ten doesn't understand how I feel.

PREPARE/ENRICH Exercises: Creating a Wish List using Assertiveness & Active Listening,
Daily Dialogue, and Daily Compliments

#### **Conflict Resolution**

The **Conflict Resolution** category looks at a couple's ability to discuss and resolve differences. It measures how effectively couples share opinions, ideas, and feelings, even during times of conflict.

**Daniel** appears to be very concerned about their ability to discuss and resolve differences, and feels they have few strengths in this area.

**Maria** feels generally good about their conflict resolution, but has concerns about some aspects of their ability to discuss and resolve differences.

**Growth Area:** The couple disagrees or shares mutual concern about most items in this category. Help them discuss 1-2 Agreement items and 2-3 of the Disagreement, Indecision, or Special Focus items listed below. By learning and practicing new skills such as the 10 Steps for Resolving Conflict, they can improve their relationship.

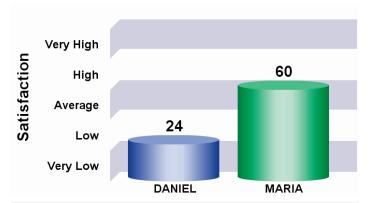

Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	
1	2	3	4	5	

<b>Daniel</b> 2	Maria 2	_	Positive Couple Agreement (20%) At times my partner does not take our disagreements seriously.
2	1	-	Sometimes we have serious disputes over unimportant issues.
			Disagreement (60%)
5	3	_	At times I feel some of our differences never get resolved.
1 3	5	+	Even during disagreements, I can share my feelings and ideas with my partner.
	1	_	I go out of my way to avoid conflict with my partner.
5	1		To end an argument, I tend to give in too quickly.
4	2		When we argue, I usually end up feeling responsible for the problem.
1	3	+	When we discuss problems, my partner understands my opinions and ideas.
			Indecision (10%)
3	2	_	To avoid hurting my partner's feelings during an argument, I tend to say nothing.
			Special Focus (10%)
5	4	-	My partner and I have different ideas about the best way to solve our disagreements.

#### **Partner Style and Habits**

The **Partner Style and Habits** category measures each person's satisfaction with the personal characteristics and habits of their partner. It looks at each person's relationship style and habits as expressed in their behavior.

**Daniel** has some concerns about the personality traits, habits, and behaviors of his partner.

**Maria** feels generally good about the personality traits, habits, and behavior of her partner, but has some concerns that may need to be discussed.

**Possible Growth Area:** While the couple have some positive agreement, they disagree or share mutual concern on several items in this category. Help them discuss 2-3 Agreement items and 2-3 Disagreement, Special Focus, or Indecision items below. Reinforce good communication and problem solving skills as they discuss this difficult area.

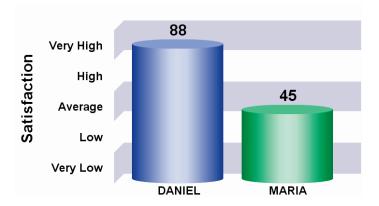

Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	
1	2	3	4	5

#### **Marriage Expectations**

The **Marriage Expectations** category measures how realistic or unrealistic each individual is about love, marriage, and the typical challenges that all married couples face.

**Daniel** is somewhat realistic and may be partially aware of the typical challenges and difficulties of marriage.

**Maria** is somewhat unrealistic and may not be aware of the typical challenges of marriage.

**Possible Growth Area:** While the couple have some positive agreement, one or both have unrealistic expectations on several items in this category. Reviewing the myths that lead to later disappointment can help couples enter marriage with a mature understanding of the natural challenges all marriages face.

2	Z	+	At times, I expect our marriage will be disappointing and frustrating.

PREPARE/ENRICH Exercises: Managing your Expectations

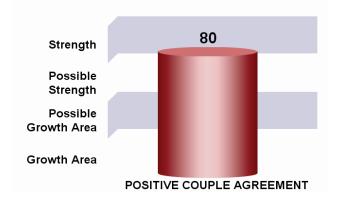

#### **Parenting Expectations**

The **Parenting Expectations** category measures agreement on issues related to having and raising children. This category explores opinions about starting a family, handling discipline, and sharing parental responsibilities.

**Daniel** is confident that they have discussed and agreed on many issues related to having and raising children together.

**Maria** feels good about their communication and agreement on issues related to having and raising children together.

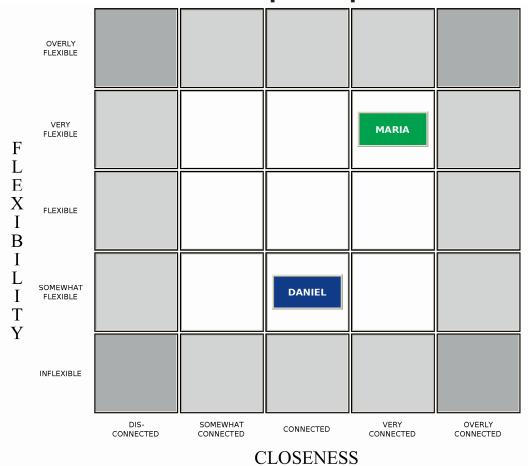

**Relationship Strength:** The couple has positive agreement with most items in this category. It is important for couples to share their opinions about if or when they would like to start a family. Praise this couple for already beginning to discuss how they want to raise children and share parenting responsibilities.

Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree

5	4	+	My partner and I agree on the type of religious upbringing for our future children.
4	5	+	My partner is very good with children and would be a great parent.
4	5	+	We have discussed if and when we would like to have children.
4	5	+	We have discussed the responsibilities of both parents in raising children.
			Disagreement (0%)
3	2	+	Indecision (10%) We agree on the number of children we would like to have.
2	2	+	Special Focus (10%) We have discussed how children should be disciplined.

PREPARE/ENRICH Exercises: Children & Parenting: Discussion Questions

#### **Couple Map**

**Couple Closeness** is defined as the emotional closeness one feels toward their partner. On this dimension, relationships can range from *disconnected* to *overly connected*.

- **Daniel** describes this relationship as **Connected**. These individuals experience a healthy balance of "We" and "I", or closeness and separateness, which reflects an interdependent relationship. Most healthy marriages not only foster connection, but also leave room for each partner to continue to grow and develop as individuals.
- Maria describes this relationship as Very Connected. Very connected couples often have a good balance of closeness and separateness, which reflects an interdependent relationship. Healthy marriages foster connection, but also leave room for each partner to pursue individual interests and activities.

**Couple Flexibility** is defined as the ability to adjust to changes in roles and leadership in response to life's demands. On this dimension, relationships can range from *inflexible* to *overly flexible*.

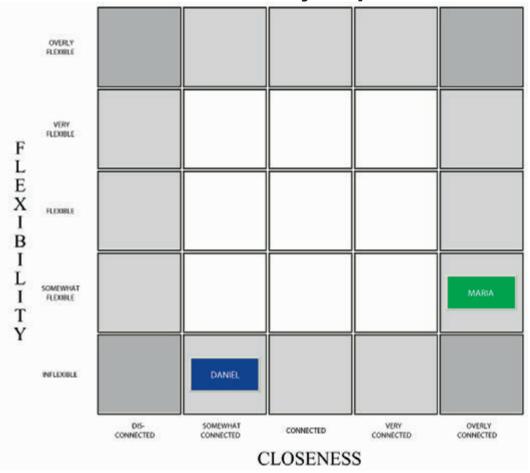

- **Daniel** feels the relationship is **Somewhat Flexible**, with more stability and less openness to change. The partners may sometimes resist changes in leadership or roles and may need to remember that healthy relationships often require the ability to be flexible while meeting the demands of busy lives.
- **Maria** feels the relationship is **Very Flexible**, with a good balance between stability and change. They may often share decision making and are able to adjust to ongoing issues. Most couples function well with this level of flexibility.

**Couple Discussion:** Review the Closeness and Flexibility results. It can be helpful to discuss what is positive about the current levels of closeness and flexibility. It can also be helpful to discuss any desired changes (increases or decreases) in closeness and flexibility.

PREPARE/ENRICH Exercises: Mapping Your Relationship, Closeness Exercises,

Flexibility Exercises

#### **Family Map**

**Family Closeness** is defined as the emotional closeness one felt growing up in their family of origin. On this dimension, family relationships can range from *disconnected* to *overly connected*.

- **Daniel** grew up in a family that was **Somewhat Connected**. These individuals experienced some family closeness, with plenty of freedom to be an individual and pursue outside relationships.
- Maria grew up in an Overly Connected family. These individuals often describe feeling a high level of closeness in their family of origin, with closeness and loyalty being the priorities. At times they may have experienced too much connection and wished for more freedom from their family.

**Family Flexibility** is defined as a family's ability to adjust to changes in roles, leadership and discipline. On this dimension, family relationships can range from *inflexible* to *overly flexible*.

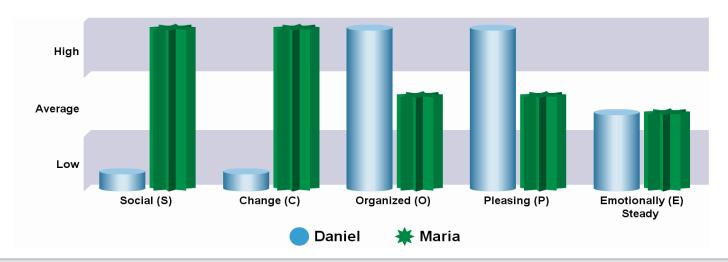

- **Daniel** experienced a family of origin that seemed **Inflexible**. These families are not very open to change. Family members are often too rigid and resist changes in leadership, roles, and routines. These families also have trouble adjusting to stress and finding new ways to deal with issues.
- Maria experienced a family of origin that seemed **Somewhat Flexible**. These families maintain a hight level of structure and organization. Leadership, decision-making, and roles are clearly defined with little flexibility. Such families can have some difficulty adjusting to stress and finding new ways to deal with challenges.

**Couple Discussion:** Review family of origin Closeness and Flexibility results. Discuss family closeness and flexibility with actual examples, such as observing a holiday, celebrating a birthday, or handling discipline. What does each person want to bring from their family into the current relationship? What does each person want to leave behind?

#### **SCOPE Personality Scales**

The **SCOPE Personality** Assessment consists of five dimensions based on the Five Factor Model of Personality. The five dimensions and the couple's results are described below. Review the results of all five dimensions, rather than focusing on just one or two traits where individuals score high or low.

Compare where the Personality SCOPE results are similar and where they are different. Discuss the advantages and drawbacks to each.

PREPARE/ENRICH Exercise: SCOPE out your Personality

#### Social (S)

This trait reflects preference for, and behavior, in social situations.

- **Daniel** scored **Low** on being Social. Such individuals tend to be reserved or introverted. Social introverts often lack the exuberance and activity levels of extroverts. They may be low-key, deliberate, and less connected socially. They often prefer to be alone or with just a few close friends. These individuals likely feel re-energized after spending time alone or in small, intimate settings, as opposed to large groups or parties. If out of balance, they could appear reclusive or cut off from others.
- Maria scored **High** on the Social dimension. These individuals are generally outgoing. Social extroverts enjoy being with people and are often full of energy. They may be enthusiastic and action-oriented. They often enjoy their ability to make friends and acquaintances easily and do not prefer solitude. In groups they like to talk, assert themselves, and may often be the center of attention. If out of balance, they could appear to be attention seeking or shallow.

**Couple Results:** Couples with one person scoring higher than the other will need to communicate openly with one another about attending social events and getting together with others. One person receives energy from socializing, while the other prefers more privacy and alone time. This difference may become more apparent when they are experiencing greater amounts of stress. They can avoid unnecessary conflict in their relationship by seeking agreement with each other before saying "yes" or "no" to making social plans.

#### **SCOPE Personality Scales**

#### Change (C)

This trait reflects openness to change, flexibility, and interest in new experiences.

- **Daniel** scored **Low** on Change. These individuals are more down to earth, practical in nature, and relatively less interested in new ideas and experiences. Change may be difficult for them and increase their level of stress. These individuals prefer the familiar and things they are accustomed to. Their attitudes are likely to be more conventional or traditional. When out of balance, they could appear rigid or closed off to new experiences.
- Maria scored High on Change. These individuals will tend to be flexible, unconventional, and very open to new experiences. They are open to change, and often have a broad range of interests. They thrive on developing new and creative solutions to problems, even when a tried and true method might work just as well. When out of balance, they may appear to be too interested in new ideas and adventures. Others may wonder why they are constantly trying to reinvent the wheel.

**Couple Results:** One person scoring higher than the other may represent a case of being attracted to their opposite. The more practical person is often attracted to the other's free-thinking and open attitudes. Conversely, the more open person may recognize the value of their partner's steady approach to life. There may be times when the other's attitudes, preferences, or behavior will be challenging or frustrating. They'll want to remember to work with differences rather than attempt to change or criticize one another. Building off each other's strengths can help them appreciate their differences.

#### Organized (O)

This trait reflects how organized and persistent a person is in their daily life and work. It also reflects persistence in pursuing goals.

- **Daniel** scored in the **High** range on this personality dimension. These individuals are methodical and well organized. They tend to be persistent and reliable and place great emphasis on this type of behavior. They are quite goal-oriented, and have a well-thought-out plan as they strive to achieve their goals. When out of balance, they could be perceived as perfectionist or overly driven. Others may even see them as being too organized or controlling in their approach to life.
- Maria scored in the Average range on this personality dimension. These individuals are generally
  organized. They are often dependable and goal-oriented, but can also be flexible, setting aside work
  and agendas. They know how to get organized, but it is not always a high priority. Their home and
  workspace are likely to be somewhat cluttered, but they know where things are located.

**Couple Results:** Couples with one person scoring higher than the other will need to communicate openly with one another about their goals, roles, and expectations. It is likely that their partner's tendencies may be endearing at times, but these qualities can also become annoying, distracting, or even maddening when stressful events come their way. The partners can balance one another out and avoid the extremes of perfectionism versus sloppiness. Potential challenges include different expectations for housekeeping, relationship roles, and long-term goals. They can work with their strengths and allow the more organized individual to handle necessary details. But they will also need to guard against expecting the organized individual to function more like a "parent" and less like a "partner."

#### **SCOPE Personality Scales**

#### Pleasing (P)

This trait reflects how considerate and cooperative one is in their interactions with others.

- **Daniel** scored **High** on the Pleasing dimension. These individuals will be trusting, friendly, and cooperative. They value getting along with others, and are considerate, and helpful. Optimistic about people, they view others as basically honest, decent, and trustworthy. When out of balance, they may sacrifice their own feelings and opinions to please others. Some acquaintances may even see them as a push-over. In their partner relationship, they may find it difficult to ask for what they need.
- Maria scored in the Average range on Pleasing. These individuals can be warm and cooperative, but occasionally somewhat competitive, stubborn, or assertive. When they feel their rights are violated, they are able to respond and stand up for themselves. They might occasionally find themselves arguing about little matters, but generally know how to get along well with others and are well liked.

**Couple Results:** Couples with one person scoring higher than the other may need to practice their communication and conflict resolution skills. One partner may need to develop their ability to honestly express both positive and negative opinions and feelings. In so doing, they can allow the more assertive partner the opportunity to truly understand how they feel. The other partner will benefit from working to be a good listener. Looking for the positives in each other's personality styles can strengthen the relationship.

#### **Emotionally Steady (E)**

This trait reflects the tendency to stay relaxed and calm even when faced with stress, versus those who are more reactive to stress in their life.

Both individuals scored in the Average range on Emotionally Steady. These individuals are
generally calm and able to cope with stress. Others likely see them as capable of handling the
everyday stressors that face most people. When under high levels of stress, they could experience
negative feelings of anxiety, depression or anger, but are generally emotionally steady and in
control of their lives.

**Couple Results:** Both individuals may find it helpful to avoid unnecessary stress. They will benefit by being realistic about what they can handle individually and together. Skills such as communication, problem solving and flexibility can help navigate stressful times without extreme emotions or negative reactions.
